INDEX TO SUBJECTS

A

Acetylcholine, effect on postjunctional membrane permeability, in electroplaque, 21
– receptor of *Electrophorus* electroplaques, equilibria and rates, neurally evoked postsynaptic currents, voltage-jump relaxations, 187
Alkalinization, internal, and induction of preferential hemolysis in postnatal red cells, 385
Antigen, L, heterogeneity, and active and passive cation transport, in low potassium red cells, evidence against leak-pump interconversion, 221
Artery, smooth muscle cells, electro- and pharmacomechanical coupling, 129
Axon, giant, potassium channel, sodium ions as blocking agents and charge carriers, 707
Axons, and control of ionized calcium, 329
–, isolated, and intracellular calcium buffering capacity, 355

B

Balanus photoreceptor, dark-adapted, cation and anion sequences, 531
– photoreceptor, intracellular Cl^- activity, and liquid and solid-state Cl^--sensitive microelectrodes, 507
– photoreceptors, prolonged depolarizing afterpotential, lability, 441
Bilayers, lipid, planar, water permeability, comment, 123
–, lipid, planar, water permeability, reply, 125
Bufo marinus rod photoreceptors, electrical and adaptive properties, effects of altered extracellular Ca^{2+} levels, 747
– rod photoreceptors, electrical and adaptive properties, effects of cyclic nucleotides and prostaglandins, 771

C

Calcium buffering capacity, intracellular, in isolated axons, 355
Calcium-dependent electrogenesis in single muscle fibers, inhibition by hypertonic solutions, 491
Calcium injection, intracellular, and light adaptation, effects on photoresponse of *Limulus* ventral photoreceptors, quantitative comparison, 591
–, ionized, in axons, control, 329
Calcium^{2+} levels, extracellular, effects of alteration, on electrical and adaptive properties of *Bufo marinus* rod photoreceptors, 747
Calcium/Na transport, mechanism, 681
Cellular, extra-, Ca^{2+} levels, effects of alteration, on electrical and adaptive properties of *Bufo marinus* rod photoreceptors, 747
–, extra-, clefts of cardiac Purkinje fibers, depletion and accumulation of potassium during voltage clamp hyperpolarization and depolarization, experiments in sodium-free bathing media, 149
–, intra-, calcium buffering capacity in isolated axons, 355
–, intra-, calcium injection, and light adaptation, effects on photoresponse of *Limulus* ventral photoreceptors, quantitative comparison, 591
–, intra-, Cl^- activity in *Balanus* photoreceptor, and liquid and solid-state Cl^--sensitive microelectrodes, 507
–, intra-, sodium, increased, mimics aspects of photoreceptor adaptation in *Limulus* ventral eye, 601
Channel, potassium, of giant axon, sodium ions as blocking agents and charge carriers, 707
–, sodium, inactivation, gating current experiments, 567
–, sodium, inactivation, sodium current experiments, 549
Chloride$^-$ activity, intracellular, in *Balanus* photoreceptor, and liquid and solid-state Cl^--sensitive microelectrodes, 507
Chloride$^-$-sensitive microelectrodes, liquid and solid-state, and intracellular Cl^- activity in *Balanus* photoreceptor, 507

Chloride, low-, solutions, effects on action potentials of cardiac Purkinje fibers, 635
–, role in volume response, in ouabain-insensitive salt and water movements in red cells, 99
– transport kinetics in human red cells, temperature-dependent changes, 283
Choline, acetyl-, effect on postjunctional membrane permeability, in eel electroplaque, 21
–, acetyl-, receptor, of *Electrophorus* electroplaques, equilibria and rates, neurally evoked postsynaptic currents, voltage-jump relaxations, 187
Contraction of skeletal and cardiac muscle, rising phase, mechanical control, 697
Coupling, electromechanical and pharmacomechanical, in smooth muscle cells of artery, 129

E

Electrogenesis, Ca-dependent, in single muscle fibers, inhibition by hypertonic solutions, 491
Electrophorus electroplaques, acetylcholine receptor, rates and equilibria, neurally evoked postsynaptic currents, voltage-jump relaxations, 187
Electroplaque, postjunctional membrane, permeability, effect of acetylcholine, 21
Electroplaques, of *Electrophorus*, acetylcholine receptor, rates and equilibria, neurally evoked postsynaptic currents, voltage-jump relaxations, 187
Epithelium, tight, nystatin as probe for investigating electrical properties, 427
Equilibria and rates at acetylcholine receptor of *Electrophorus* electroplaques, neurally evoked postsynaptic currents, voltage-jump relaxations, 187
Erythrocytes, human, chloride transport kinetics, temperature-dependent changes, 283
–, human, glycolytic rate, and 2,4,6-trinitrophenol, accelerating effect, 661
–, human, uridine transport, 679
–, low potassium, active and passive cation transport and L antigen heterogeneity, evidence against leak-pump interconversion, 221
– and naturally occurring reticulocytes from newborn piglets, glucose permeability, 171
Erythrocytes, ouabain-insensitive salt and water movements, cation transport under hypertonic conditions, kinetics, 59
–, ouabain-insensitive salt and water movements, norepinephrine stimulation of sodium plus potassium cotransport, 81
–, ouabain-insensitive salt and water movements, role of chloride in volume response, 99
–, postnatal, induction of preferential hemolysis by internal alkalinization, 385
Extracellular Ca^{2+} levels, effects of alteration, on electrical and adaptive properties of *Bufo marinus* rod photoreceptors, 747
– clefts of cardiac Purkinje fibers, depletion and accumulation of potassium, during voltage clamp hyperpolarization and depolarization, experiments in sodium-free bathing media, 149

F

Fibers, muscle, single, Ca-dependent electrogenesis, inhibition by hypertonic solutions, 491
–, Purkinje, cardiac, action potentials, effects of low-chloride solutions, 635
–, Purkinje, cardiac, two levels of resting potential, 725

G

Glucose permeability in naturally occurring reticulocytes and red cells from newborn piglets, 171
Glycolytic rate of human red cells, and 2,4,6-trinitrophenol, accelerating effect, 661

H

Hemolysis, preferential, of postnatal red cells, induction by internal alkalinization, 385
Hyperpolarization, pigment epithelial, photoreceptor-dependent, and potassium, 405
Hypertonic conditions and kinetics of cation transport, ouabain-insensitive salt and water movements in red cells, 59

I

Intracellular calcium buffering capacity in isolated axons, 355
– calcium injection, and light adaptation, effects on photoresponse of *Limulus* ventral photoreceptors, quantitative comparison, 591
– Cl^- activity in *Balanus* photoreceptor, and liquid and solid-state Cl^--sensitive microelectrodes, 507
– sodium, increased, mimics aspects of photoreceptor adaptation in *Limulus* ventral eye, 601

J

Junctional, post-, membrane, in eel electroplaque, effect of acetylcholine on permeability, 21

L

Limulus single photoreceptors, rhodopsin molecules, electrophysiological measurement of number, 621
– ventral eye, aspects of photoreceptor adaptation mimicked by increased intracellular sodium, 601
– ventral photoreceptors, photoresponse, effects of intracellular calcium injection and light adaptation, quantitative comparison, 591
Lipid bilayers, planar, water permeability, comment, 123
– bilayers, planar, water permeability, reply, 125

M

Man, red cells, chloride transport kinetics, temperature-dependent changes, 283
–, red cells, glycolytic rate, and 2,4,6-trinitrophenol, accelerating effect, 661
–, red cells, transport of uridine, 679
Membrane, egg cell, in K^+-Tl^+ mixtures, anomalous permeabilities, 269
–, postjunctional, in electroplaque, permeability, effect of acetylcholine, 21
Membranes of rhabdomeric photoreceptor, rotational and translational diffusion of pigment, restrictions, 453
Muscle fibers, single, Ca-dependent electrogenesis, inhibition by hypertonic solutions, 491
Muscle, skeletal and cardiac, contraction, mechanical control of rising phase, 697
–, skeletal, transverse tubules, delayed rectification, origin of late after potential, 1
–, smooth, cells, of artery, electro- and pharmacomechanical coupling, 129

N

Necturus proximal tubule, kinetics of Na^+ transport, 307
Norepinephrine stimulation of sodium plus potassium cotransport, ouabain-insensitive, in red cells, 81
Nucleotides, cyclic, and prostaglandins, effects on electrical and adaptive properties of rod photoreceptors of *Bufo marinus*, 771
Nystatin as probe for investigating electrical properties of tight epithelium, 427

O

Ouabain-insensitive salt and water movements in red cells, cation transport under hypertonic conditions, kinetics, 59
– salt and water movements in red cells, norepinephrine stimulation of sodium plus potassium cotransport, 81
– salt and water movements in red cells, role of chloride in volume response, 99

P

Peptides, melanotropic, in neurointermediate lobe of *Xenopus laevis*, biosynthesis, processing, control of release, 37
Permeability, of glucose, in naturally occurring reticulocytes and red cells from newborn piglets, 171
– of postjunctional membrane, in eel electroplaque, effect of acetylcholine, 21
–, of water, through planar lipid bilayers, comment, 123
–, of water, through planar lipid bilayers, reply, 125
Permeabilities, anomalous, of egg cell membrane in K^+-Tl^+ mixtures, 269
Photoreceptor adaptation, in *Limulus* ventral eye, aspects mimicked by in-

creased intracellular sodium, 601
Photoreceptor, *Balanus*, dark-adapted, cation and anion sequences, 531
–, *Balanus*, intracellular Cl^- activity, and liquid and solid-state Cl^--sensitive microelectrodes, 507
–, rhabdomeric, membranes, rotational and translational diffusion of pigment, restrictions, 453
Photoreceptor-dependent pigment epithelial hyperpolarization, and potassium, 405
Photoreceptors, *Balanus*, prolonged depolarizing afterpotential, lability, 441
–, rod, in *Bufo marinus*, electrical and adaptive properties, effects of altered extracellular Ca^{2+} levels, 747
–, rod, in *Bufo marinus*, electrical and adaptive properties, effects of cyclic nucleotides and prostaglandins, 771
–, single, of *Limulus*, and rhodopsin molecules, electrophysiological measurement of number, 621
–, ventral, of *Limulus*, photoresponse, effects of intracellular calcium injection and light adaptation, quantitative comparison, 591
Phenol, 2,4,6-trinitro-, and glycolytic rate of human red cells, accelerating effect, 661
Pigment, rotational and translational diffusion, restrictions, in membranes of rhabdomeric photoreceptor, 453
Postjunctional membrane, in electroplaque, effect of acetylcholine on permeability, 21
Postnatal red cells, preferential hemolysis induced by internal alkalinization, 385
Potassium channel of giant axon, sodium ions as blocking agents and charge carriers, 707
–, depletion and accumulation, in extracellular clefts of cardiac Purkinje fibers, during voltage clamp hyperpolarization and depolarization, experiments in sodium-free bathing media, 149
–, low, red cells, active and passive cation transport and L antigen heterogeneity, evidence against leak-pump interconversion, 221
– and photoreceptor-dependent pigment epithelial hyperpolarization, 405
– plus sodium cotransport, ouabain-insensitive, in red cells, stimulation by norepinephrine, 81
Potassium$^+$-Tl$^+$ mixtures, and anomalous permeabilities of egg cell membrane, 269
Prostaglandins and cyclic nucleotides, effects on electrical and adaptive properties of rod photoreceptors of *Bufo marinus*, 747
Purkinje fibers, cardiac, action potentials, effects of low-chloride solutions, 635
– fibers, cardiac, depletion and accumulation of potassium in extracellular clefts, during voltage clamp hyperpolarization and depolarization, experiments in sodium-free bathing media, 149
– fibers, cardiac, two levels of resting potential, 725

R

Red blood cells. *See* erythrocytes.
Reticulocytes, naturally occurring, and red cells from newborn piglets, glucose permeability, 171
Rhodopsin molecules in single *Limulus* photoreceptors, electrophysiological measurement of number, 621
Rod photoreceptors in *Bufo marinus*, electrical and adaptive properties, effects of cyclic nucleotides and prostaglandins, 771
– photoreceptors in *Bufo marinus*, electrical and adaptive properties, effects of altered extracellular Ca^{2+} levels, 747

S

Sodium/Ca transport, mechanism, 681
Sodium channel inactivation, gating current experiments, 567
– channel inactivation, sodium current experiments, 549
–, intracellular, increased, mimics aspects of photoreceptor adaptation in *Limulus* ventral eye, 601
– ions as blocking agents and charge carriers in potassium channel of giant axon, 707
– plus potassium cotransport, ouabain-insensitive, in red cells, stimulation by norepinephrine, 81
Sodium$^+$ transport in *Necturus* proximal tubule, kinetics, 307
Sodium-free bathing media, and deple-

tion and accumulation of potassium in extracellular clefts of cardiac Purkinje fibers, during voltage clamp hyperpolarization and depolarization, 149
Synaptic transmission, nonlinear, 243

T

Thallium$^+$-K$^+$ mixtures, and anomalous permeabilities of egg cell membrane, 269
Transmission, synaptic, nonlinear, 243
2,4,6-Trinitrophenol, and glycolytic rate of human red cells, accelerating effect, 661
Tubule, proximal, of *Necturus*, kinetics of Na^+ transport, 307
Tubules, transverse, in skeletal muscle, delayed rectification, origin of late afterpotential, 1

U

Uridine transport in human red cells, 679

X

Xenopus laevis, neurointermediate lobe, melanotropic peptides, biosynthesis, processing, control of release, 37

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, United States Code. The Journal of General Physiology, published monthly at 1230 York Ave, New York 10021 by The Rockefeller University Press, New York 10021. Editor: Paul F. Cranefield, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12-month average and number nearest to date of filing: copies printed for each issue, 2540; sales through dealers, street vendors, counter sales, mail subscriptions, 2299. Total paid circulation, 2299; free distribution, 57; office use, left-over, unaccounted, spoiled, 184; net press run, 2540. Single issue nearest filing date, Oct. 1977.

VOLUME 70 · NUMBER 5 · NOVEMBER 1977

549 FRANCISCO BEZANILLA and CLAY M. ARMSTRONG. Inactivation of the sodium channel. I. Sodium current experiments

567 CLAY M. ARMSTRONG and FRANCISCO BEZANILLA. Inactivation of the sodium channel. II. Gating current experiments

591 ALAN FEIN and J. SHERWOOD CHARLTON. A quantitative comparison of the effects of intracellular calcium injection and light adaptation on the photoresponse of *Limulus* ventral photoreceptors

601 ALAN FEIN and J. SHERWOOD CHARLTON. Increased intracellular sodium mimics some but not all aspects of photoreceptor adaptation in the ventral eye of *Limulus*

621 J. E. LISMAN and H. BERING. Electrophysiological measurement of the number of rhodopsin molecules in single *Limulus* photoreceptors

635 JAMES L. KENYON and W. R. GIBBONS. Effects of low-chloride solutions on action potentials of sheep cardiac Purkinje fibers

661 B. VESTERGAARD-BOGIND and G. LUNN. Accelerating effect of 2,4, 6-trinitrophenol on the glycolytic rate of human red cells

679 LETTER TO THE EDITOR
H. GINSBURG and Z. I. CABANTCHIK. On uridine transport in human red blood cells

VOLUME 70 · NUMBER 6 · DECEMBER 1977

681 L. J. MULLINS. A mechanism for Na/Ca transport

697 EMIL BOZLER. Mechanical control of the rising phase of contraction of frog skeletal and cardiac muscle

707 ROBERT J. FRENCH and JAY B. WELLS. Sodium ions as blocking agents and charge carriers in the potassium channel of the squid giant axon

725 DAVID C. GADSBY and PAUL F. CRANEFIELD. Two levels of resting potential in cardiac Purkinje fibers

747 STUART A. LIPTON, SANFORD E. OSTROY, and JOHN E. DOWLING. Electrical and adaptive properties of rod photoreceptors in *Bufo marinus*. I. Effects of altered extracellular Ca^{2+} levels

771 STUART A. LIPTON, HOWARD RASMUSSEN, and JOHN E. DOWLING. Electrical and adaptive properties of rod photoreceptors in *Bufo marinus*. II. Effects of cyclic nucleotides and prostaglandins

1*a*–26*a* ABSTRACTS OF PAPERS PRESENTED AT THE THIRTIETH ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS

793 INDEXES TO VOLUME 70
